

## **Update Release Notes for version 5.32, released June 27, 2018**

*Please be sure to install the updates when prompted. Your device must be online to receive the updates.*

### **New Features**

- **New Devices**
  - Sunmi T1 Mini has been added to the OpSuite POS available devices. It has an integrated printer, as well as an integrated customer line display.
  - Star TSP series receipt printers.
- Cash Paid Out allows a user to use cash to pay a vendor or other expenses. A receipt can be enabled to track the pay out with the date, time, cashier, amount, and the reason.

### **Bug Fixes and Updates**

- **Transaction History**
  - When a transaction is placed on hold, recalled, and placed on hold again, the system will no longer create an additional held transaction.
  - An issue has been fixed when voiding a recently refunded transaction.
  - Recalling a recently completed transaction with a quick add customer, will now display the customer information correctly.
  - Transaction History will show transactions in numerical order by transaction number, including transactions that are still pending sync.
  - Transaction history will display transactions from the user's authorized locations only.
  - Held Transactions will display all line items when offline.
- **Receipts**
  - Receipts will only be emailed when selected, or when "Always try email receipts" is set and a valid email address is present on the customer record or entered into the email field.
  - Line items printed on the receipt will auto wrap to a new line when required.
  - Cash Drop and Paid Out receipts now display the transaction number.
  - Full Page Invoice
    - Line item comments can now be added to the full page invoice and will auto word wrap as needed.
    - The shipping address shown on an invoice can be selected from existing customer addresses, or entered as a new address.
    - Discounts will now display by line item, or at the subtotal/total, depending on setting.
- **Transactions**
  - OpSuite POS has been optimized to support transactions with up to 300 lines per transaction.
  - When a transaction is cancelled from the Genius (Cayan) device, the POS will now display the correct transaction total.
  - Reason codes assigned on items with manually adjusting a prices will now record correctly.
  - When performing a Cash Drop or Paid Out, the cash drawer will not open until the action is completed.
  - Manually changing the quantity of a line item that is on sale will now calculate the correct price.
  - The system timeout was extended for Genius/Cayan devices to allow for delays in processing.

- Transaction totals now update in real time, resolving an issue where credit card tenders periodically could appear to not complete properly.
- If an item is marked “Do Not Sell” in OpSuite and added to a transaction, the cashier will receive a message indicating that the Item is not available for sale.
- Return transactions will now honor sale pricing of original transaction.
- **Devices**
  - Transactions using Genius Mini (Chipper) will now auto-complete.
  - Screen orientation will remain set when the application is closed or logged out.
- **Reports**
  - An issue with rounding was corrected on the EOD (End of Day) report.
- **Customers**
  - Changes to a customer record made at the POS are now syncing with OpSuite properly.
